

Bash User Input

Last updated by | Shakibe Hasan | Jun 9, 2023 at 6:12 PM GMT+6

3 ways to take User Input:

1. Using **read** command. This wont prompt anything.
2. Using **read -p** command. This is use to take input by prompting a instruction for user.
3. Using **read -sp** command. This is to hide input from the user for security purpose.

```
bashScript.sh (~/Desktop)
File Edit View Search Tools Documents Help
+ [ ] [ ] | [ ] [ ] | [ ] [ ] | [ ] [ ]
bashScript.sh x
#!/usr/bin/bash
echo "Enter first name:"
read first_name
read -p "Enter last name:" last_name
read -sp "Password:" pass
echo
echo "All way to take input: "
echo $first_name
echo $last_name
echo $pass

sh Spaces: 4 Ln 11, Col 11 INS

devops@devops-Lenovo-G410: ~/Desktop
File Edit View Search Terminal Help
devops@devops - Lenovo - G410:~/Desktop$ ./bashScript.sh
Enter first name:
Shakibe
Enter last name:Hasan
Password:
All way to take input:
Shakibe
Hasan
SSSSS
devops@devops - Lenovo - G410:~/Desktop$
```
